DETAILED ACTION

1. This action is responsive to application received on April 4, 2004.
2. Claims 1-11 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Paciulan on Nov. 22, 2004.

The application has been amended as follows:

In the specification, the full paragraph starting on page 1 lines 7 and ending on page 2 line 5 has been replaced by:

This patent application is further related to the following U.S. Patent Applications filed concurrently herewith and commonly assigned, entitled "A Method of Sharing Information among a Plurality of Stations in a Frame-based Communications Network" Application No. **09/825,708**, "A Method of Enhancing Network Transmission on a Priority-enabled Frame-based Communications Network" Application No. **09/825,897**, "A Method of Determining a Start of a Transmitted Frame in a Frame-based Communications Network" Application No. **09/825,903**, "A Method of Determining an End of a Transmitted Frame in a Frame-based Communications Network" Application No. **09/825,775**, "A Method for Providing Dynamic Adjustment of Frame Encoding

Parameters in a Frame-based Communications Network" Application No. **09/826,218**, "A Method for Selecting Frame Encoding Parameters in a Frame-based Communications Network" Application No. **09/826,435**, "A Method for Selecting Frame Encoding Parameters to Improve Transmission Performance in a Frame-based Communications Network" Application No. **09/825,756**, "A Method of Determining a Collision Between a Plurality of Transmitting Stations in a Frame-based Communications Network" Application No. **09/825,801**, "A Method of Providing Synchronous Transport of Packets Between Asynchronous Network Nodes in a Frame-based Communications Network" Application No. **09/825,851**, "A Method of Controlling Data Sampling Clocking of Asynchronous Network Nodes in a Frame-based Communications Network" Application No. **09/826,067**, "A Method and Apparatus for Optimizing Signal Transformation in a Frame-based Communications Network" Application No. **09/825,599**, "A Method and Apparatus for Transceiver Noise Reduction in a Frame-based Communications Network" Application No. **09/825,638**, "A Method for Selecting an Operating Mode for a Frame-based Communications Network" Application No. **09/825,791**, and "A Transceiver Method and Signal Therefor Embodied in a Carrier Wave for a Frame-based Communications Network" Application No. **09/826,239**.

4. Pursuant to 37 C.F.R. 1.109 and M.P.E.P. 1302.14, the following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach neither singly or in combination the claimed limitation of "distributing sets of collision resolution parameters to be used for resolution of network access contention events among nodes of non-centralized media access

control shared medium network, providing a set of collision resolution parameters which includes a sequence of fixed numbers resolving a single network access contention event; identifying a single collision signal slot master node when one or more candidate collision signal slot master nodes exist; and sending collision signal slot request messages from client nodes addressed to all network nodes" as in claims 1-11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
